WORK EXPERIENCE

Freelance AI Developer | May 2025 – May 2026 | USA & Germany · Remote

- USA (May – Aug 2025): Built an insurance comparison MVP that parses publicly available drug and procedure pricing files, structures cost comparisons across plans, and integrates an AI assistant where users describe symptoms to get relevant coverage and medication guidance
- Germany (Feb – May 2026): Developed a full-stack dual-sided job marketplace where employers post listings and candidates browse daily-fetched jobs via third-party APIs, upload CVs, and generate tailored CVs per application, fully localised in English and German using i18n

AI Engineer at AutoAML | Aug – Dec 2025 | Remote · Contract

- Built and integrated features across the frontend and backend of an intelligent compliance platform
- Streamlined user authentication flows and improved UX across core workflows
- Integrated LLMs to enhance AI-driven compliance automation capabilities

AI Intern at U Microfinance Bank | Jul – Aug 2025 | Islamabad · Risk Department

- Built an end-to-end auditing tool using Sentence Transformers + an LLM to validate SOC analyst comments against case-closing playbooks, integrated live via the bank's internal API
- Built a Model Context Protocol (MCP) interface for the team to query an internal vulnerability database in natural language

AI Automation Associate at ByteBricks | Nov 2024 – Apr 2025

- Designed Make.com pipelines for competitor monitoring, content publishing, and AI-driven WordPress posting via RSS
- Handled client acquisition, technical scoping, and lead generation alongside delivery work

AI Intern at ByteBricks | Jun – Aug 2024

- Built LangChain + FastAPI chatbots with external API integrations and conversation memory for customer support and lead generation
- Developed VAPI voice assistants for appointment scheduling using domain-specific knowledge bases

FINAL YEAR PROJECT

ToonCraft

Next.js · Django · ComfyUI · Firebase · 2026 — End-to-end AI video generator that converts story prompts into 8-scene storyboards via Llama 3.3 70B, generates scene images via Flux 1-Dev with character LoRA, animates them with Wan 2.2 image-to-video, and compiles the final MP4 with FFmpeg. Orchestrated multi-model ComfyUI pipeline via WebSockets, with Firebase Auth, PostgreSQL, and Next.js 15 App Router.

EDUCATION

FAST University | 2022 – 2026 | Islamabad, Pakistan

BS Data Science · Final Semester · Graduating 2026

STACK

AI / LLMs: Python, LangChain, LLMs, Sentence Transformers, MCP, RAG, VAPI

Backend: FastAPI, PostgreSQL, Supabase

ML / Data: Scikit-learn, Pandas, TensorFlow

Frontend: React, Next.js

Tools: Git, Make.com, Postman, Hugging Face, OpenRouter, Vercel, Supabase

RELEVANT COURSEWORK

Machine Learning · Deep Learning · Data Structures · Database Systems · Natural Language Processing · Probability & Statistics

OPEN TO

AI engineering and applied AI product roles.
